

**Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all**

Education enables upward socio-economic mobility and is a key to escaping poverty. As a policy intervention, education is a force multiplier which enables self-reliance, boosts economic growth by enhancing skills, and improves people’s lives by opening up opportunities for better livelihoods.

**Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all**

Sustained and inclusive economic growth can drive progress, create decent jobs for all and improve living standards. The goal is to support these jobs and to finance small, creative and innovative entrepreneurial initiatives while also protecting labour rights and promoting secure places of work.

**Achieve gender equality and empower all women and girls**

Gender equality is not only a fundamental human right, but a necessary foundation for a peaceful, prosperous and sustainable world.

The exclusion of women places half of the world’s population outside the realm of opportunity to partner in building prosperous societies and economies. Equal access to education, decent work, and representation in political and economic decision making processes are not only rights women should have, they benefit humanity at large

**Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels**

The goal is to restore security and human rights to individuals whose very lives and basic freedoms are under threat either due to direct violence or through institutional restrictions to justice. To attain this, national and global institutions have to be more transparent and effective, including local governance and judicial systems which are critical to the guarantee of human rights, law and order, and security.
